

DESCRIPTION AND OBJECTIVES

- ✓ Practical training in the most relevant hysteroscopic procedures with exposure to new technologies.
- ✓ Diagnostic and mechanical operative hysteroscopy, myomectomy, polyp surgery and endometrial resection will be covered with intensive practice.
- ✓ The limited number of participants per session and the presence of a faculty with large experience in teaching an training hysteroscopy guarantee a personal and intensive learning process.

TARGET AUDIENCE

- ✓ Open for experts and novice hysteroscopists who want to update their knowledge and skills in conventional hysteroscopy and learn about the application of new technologies.

REQUIREMENTS

- ✓ There are no specific requirements for participants. However, it is highly advisable to complete the free on-line theoretical programme (www.websurg.com/winners) beforehand, thus dedicating the entire session time to hands-on.
